

Getting my DATA on the Oasis HUB - December 12<sup>th</sup>, 2018

1	How do we engage with Oasis Hub commercially?
	If you've got data, tools, or services you would like to make available via the Oasis HUB simply drop an email to <a href="mailto:hello@oasishub.co">hello@oasishub.co</a> and we'll organise a conversation with you.
2	If I don't want my data to go to a competitor how do I protect it?
	Marking a dataset as restricted gives you the peace of mind that your intellectual property is being protected. Restricted datasets trigger an email to the Oasis HUB team, who then contact you as the dataset provider to discuss any exceptions. Also, introducing a one-time secure key ensures data is only accessible by the holder of the key, which is provided either by you, or the Oasis HUB administrators subject to your guidance.
3	If I am a University with lots of data, some of which I would like to commercialise, how do I do this, can Oasis Hub advise me?
	Yes. We are working with a growing number of academic and research centres to help them commercialise their data. If you drop a note to <a href="mailto:hello@oasishub.co">hello@oasishub.co</a> we can discuss your requirements with you.
4	Can we have any specific branding around our Research Institute
	Yes. We have done something along these lines for the Insurance Development Forum (IDF) <a href="#">CatRiskTools catalogue</a> and the <a href="#">H2020_Insurance project</a> . Drop a note to <a href="mailto:hello@oasishub.co">hello@oasishub.co</a> and let's talk!
5	If I would like to upload a lot of data on our own branded area are there other things such as academic papers, films, catalogues can I have this on the site?
	Yes, we actively encourage data providers to include as much value added resources to their datasets, in the form of scientific and technical papers, use cases, user manuals, instruction videos. This not only enriches the users experience with your data it helps to differentiate it from others that purport to be offering the same services.
6	Would a branded portal have a cost?
	Yes. Branded portals take design, development, testing and on-going support resources. The fee depends on their scale and complexity. If you'd like to discuss this in more detail say <a href="mailto:hello@oasishub.co">hello@oasishub.co</a>
